TECHNICAL SKILLS

Frontend

HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS

Backend & Databases

Python, Flask, Node.js, REST APIs, MySQL, PostgreSQL, Supabase

AI & Computer Vision

Machine Learning, Computer Vision, Face Recognition, OpenCV, TensorFlow

GIS Mapping

Leaflet, OpenStreetMap, GeoJSON, Interactive Maps

Tools & Cloud

Git, GitHub, Vercel, Firebase, Figma, Photoshop, Canva

LANGUAGES

English, Telugu

PURNA CHANDRA SEKHAR

Full Stack Developer & AI/GIS Prototyper

PROFESSIONAL SUMMARY

Innovative B.Tech Computer Science Engineering student with an established record of building smart digital solutions. Experienced in full-stack web architectures, machine learning workflows, and interactive GIS systems. Highly adept at rapid prototyping, hackathon execution, and designing dashboards tailored to governance, logistics, and agriculture.

EDUCATION

B.Tech in Computer Science and Engineering (CSE)

College Name Coming Soon | 2026 – Present (Second Year)

- Focused on machine learning modeling, computer vision systems, and cloud databases.

Diploma in Computer Engineering

M.B.T.S Govt Polytechnic, Guntur | 2023 – 2026

- Gained solid foundations in algorithms, database design, object-oriented concepts, and basic networking.

EXPERIENCE

Freelance Full Stack Developer

Self-Employed | 2023 – Present

- Designed end-to-end user interfaces using Figma and deployed fast, responsive Next.js apps with Tailwind CSS.
- Integrated advanced Leaflet GIS maps and TensorFlow models to visualize geospatial and forecasting datasets.
- Built district-level management utilities and face recognition dashboards for agricultural and public sectors.

PROJECTS

AI Urban Utility Intelligence Platform

Next.js, React, Leaflet, Supabase, AI, GIS

- Constructed an intelligent smart city dashboard featuring Leaflet GIS layouts, vehicle path trackers, and forecasting dashboards for government validation workflows.

Smart Face Recognition Attendance System

Python, Flask, OpenCV, MySQL

- Created real-time face detection attendance software integrated with automated SMS alerts, coordinates-based geofencing, and automated Excel reporting.

Granite Quarry Digital Management System

Next.js, Supabase, Python, GIS

- Developed permit checking, vehicle routing systems, and district weighbridge integrations for mineral tracking.

Mulberry AI Disease Detection

Python, TensorFlow, OpenCV, Flask

- Programmed a leaf disease classifier using CNN models, delivering automated remedy cards to local farmers.
